

UNIVERSITY OF  
EASTERN FINLAND

# Master's degree programme in General Toxicology

# Master's degree programme in General Toxicology

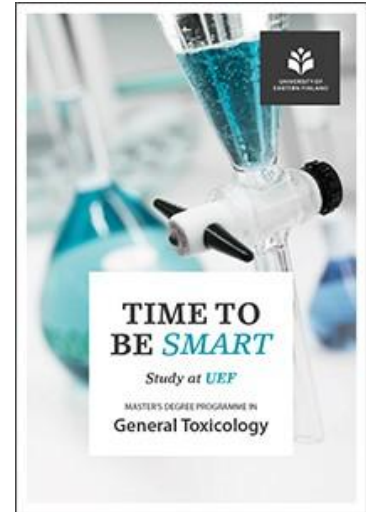

- Toxicology is an applied science which has inputs from many scientific disciplines e.g. molecular biology, chemistry, anatomy, physiology and epidemiology
- There is a great demand for experts in toxicology in our increasingly chemical world.
- The programme in general toxicology provides its students with the basic scientific knowledge and professional skills to carry out human chemical risk assessment

# Master's degree programme in General Toxicology

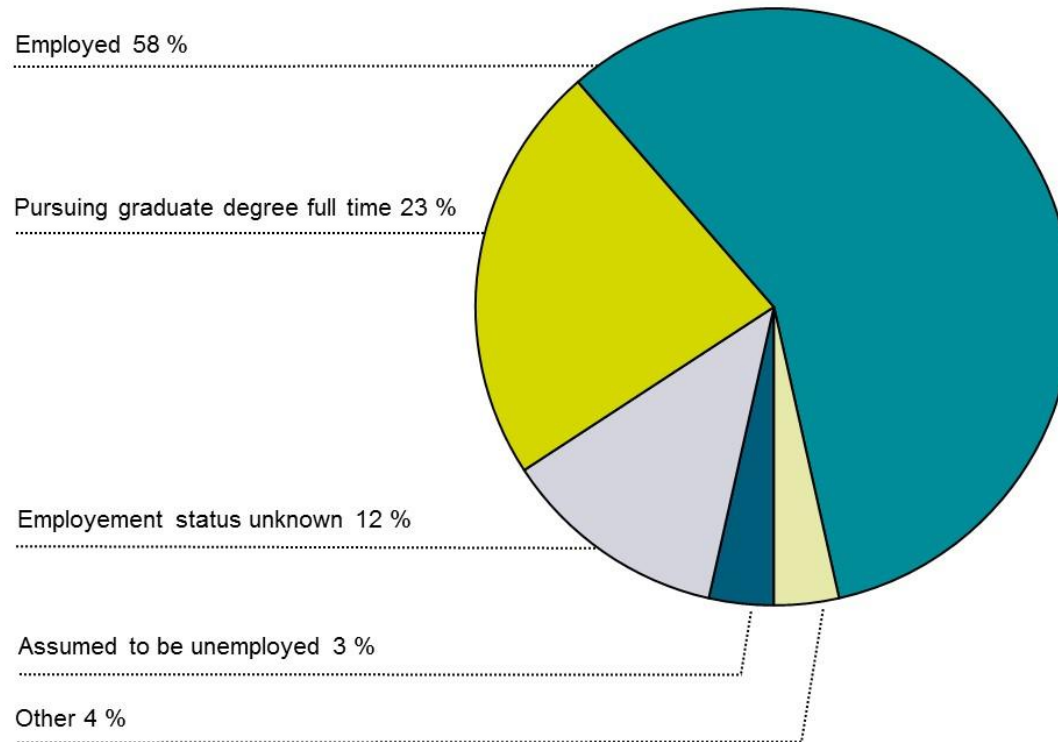

- Applicants should have Bachelor's or higher degree from a recognized University in an applicable field
- Suitable background studies are for example medicine, biology, biosciences, veterinary medicine, dentistry, environmental sciences, animal physiology, pharmacy, biochemistry
- There is no entrance exam
- Students will be accepted to the program based on their previous studies and motivation letter

# Master's degree programme in General Toxicology

- Next application period: 1. Nov. 2017 - 31. Jan. 2018
  - The admission is conditional if the degree is not completed by 13th January 2017
- More information:

# Graduate employment data for GTG Toxicology program (Graduated 1.1.2000-31.5.2016)

# Master's degree programme in General Toxicology

Students graduated from this programme work in as research scientists and experts in chemical safety and risk assessment:

- European Chemicals Agency (ECHA)
- The Finnish Safety and Chemicals Agency (Tukes)
- Universities and research institutes
